✍ CAREER OBJECTIVE

I am a student of the Department of Computer Science at Green University of Bangladesh, currently in my last semester. In addition to my expertise in web development (HTML, CSS, JavaScript, Python, React), I am actively engaged in research in machine learning and deep learning. I have completed two projects in ML and DL, and in my thesis, I am working on a dataset where I perform image annotation using Roboflow. This hands-on experience has provided me with practical, real-world skills in data annotation.

🎓 ACADEMIC QUALIFICATION

Bachelor of Science (B.Sc.)

Computer Science and Engineering (CSE)

Feb 2022 – Jan 2026

Green University of Bangladesh, Purbachal American City, Dhaka

Higher Secondary Certificate (H.S.C.)

Cantonment Public School College, Saidpur — Dinajpur Board, 2019

Group: Science — GPA: 4.67

Secondary School Certificate (S.S.C.)

Setabgonj Ideal Academy, Setabgonj, Dinajpur — Dinajpur Board, 2017

Group: Science — GPA: 5.00

PROJECTS

- **QuickShop – E-commerce Web Application** GitHub Link
QuickShop is an e-commerce platform connecting buyers, sellers, and customers, with a focus on supporting local shops to sell online. Key features include price negotiation between buyers and sellers (unique feature) and support for local shops to sell their products online.
Tech Stack: HTML, CSS, Tailwind CSS, Bootstrap, Python (Flask/Django), MySQL
- **University Portal Management – Role-based Access Control System** GitHub Link
Designed a role-specific student management system with access for Admin, Teachers, Students, and Department Heads.
Tech Stack: HTML, CSS, PHP, MySQL
- **Housing Price Prediction Using Machine Learning** GitHub Link
Predicted house prices using key features such as area, number of rooms, location, and building age.
Tech Stack: Python, Pandas, NumPy, Models (Linear Regression, KNN, K-Means, XGBoost)

RESEARCH

Detection and Classification of Brain Tumor Using a Deep Learning Framework

Ongoing

Developed a hybrid deep learning framework YOLOv11 for detection and Custom CNN for classification of brain tumors (four types) from MRI images.

Tech Stack: Python, TensorFlow, OpenCV, YOLOv11, U-Net, Custom CNN, MRI Datasets (Harvard, Figshare, Kaggle)

SKILLS

- **Frontend:** HTML5, CSS, JavaScript, Tailwind CSS, ReactJS.
- **Backend:** PHP, Python.
- **Programing Language:** C, C++, Java(Academic).
- **Tools:** Git, GitHub, VS Code, VS Code, Microsoft Office Suite.
- **Design & Simulation Tools:** Figma, Adobe Illustrator.

- **Research Models / Machine & Deep Learning:** ML, CNN, U-Net, YOLOv11, Transfer Learning
- **Soft Skills:** Interpersonal Skills, Teamwork, Leadership, Project Management

GENERAL SKILLS

- **Home Tutor:** Provided personalized one-on-one academic support for school and college students.
- **Coaching Tutor:** Prepared students for board and competitive exams with structured curriculum support.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Participated in student organizations and voluntary groups, contributing to event organization and technical workshops.
- Led and collaborated in small project teams during academic coursework.
- Engaged in various skill-enhancement workshops, hackathons, and inter-university competitions.
- Worked as a peer tutor, mentoring students in programming and CSE fundamentals.

LANGUAGE

- **English:** Excellent proficiency in reading, writing, and speaking.
- **Bengali:** Native fluency in both formal and informal communication.
